

Guide to using the TOP EZ Dashboard_ME & TOP EZ Dashboard_HFT on NinjaTrader8

TOP EZ Dashboard_ME & TOP EZ Dashboard_HFT

The EZ Dashboard is a dashboard that combines the Market Energy strategy (for EZ Dashboard_ME) to trade and the Extreme Energy indicator to determine the chosen specific timeframe bullish, bearish or neutral direction. Similarly for the EZ Dashboard_HFT except it utilizes the Hedge Fund Trender strategy instead.

Both EZ Dashboards can be used independently.

Download and import the TOP EZ Dashboard_ME & TOP EZ Dashboard_HFT

1. At the Control Center → Tools → Import → NinjaScript Add-On

2. At the Import window, go to folder where it is downloaded → Click Open. Then click Ok to any pop up windows to proceed with the import.

3. When asked for the license key, go back to the email and cut & paste it at the field.

Launching the TOP EZ Dashboard_ME & TOP EZ Dashboard_HFT

At the Control Center, click New. Then, click the EZ Dashboard that you want to use & it will pop up as a separate window.

Understanding & Using the EZ Dashboard

The screenshot shows the 'TOP EZ Dashboard ME' window. At the top, there are dropdown menus for 'Account' and 'Instrument', and a 'QTY' input field set to '1'. Below these are four buttons labeled '3S', '5S', '10S', and '15S'. The main section is titled 'TOP EZ Dashboard ME' and contains four trading pairs (TF #1 to TF #4). Each pair has a dropdown menu for the instrument and two buttons: 'BUY' and 'SELL'. Below the trading pairs, there is a summary section showing 'Unrealized: \$0', 'Total: \$0', and 'Position: FLAT'. At the bottom, there are two input fields for 'Target (\$)' and 'Limit (\$)', both set to '0'. Below these are two buttons: 'SET TARGET' (green) and 'SET LIMIT' (red). At the very bottom, there are two large buttons: 'FLATTEN ALL' (red) and 'MATCH ACCOUNT' (orange). A 'Sync: -' indicator is also present.

Account

Select the account you want to use by clicking on the dropdown selection.

Instrument

Select the symbol you want to trade on by clicking on the dropdown selection.

Qty

Key in the number of contracts you want to buy or sell for per strategy.

The screenshot shows the 'TOP EZ Dashboard ME' interface. It features three main input fields: 'Account' (a dropdown menu), 'Instrument' (set to 'ES 03-26'), and 'QTY' (set to '1'). Below these fields is a 'Hide' checkbox, which is currently unchecked.

E.g. If all 4 strategies are turned on, then the total maximum position for this particular instrument will be $1 \times 4 = 4$.

Hide

Check this box if you want to hide your account number. It will also not appear at the tab of the Dashboard at the bottom.

The screenshot shows the 'TOP EZ Dashboard ME' interface. The 'Account' field now displays '*****' instead of the account number. The 'Instrument' field is set to 'MNQ 03-26' and the 'QTY' field is set to '1'. The 'Hide' checkbox is now checked.

Extreme Energy Indicator Timeframes

These 4 boxes will show the direction of either Bullish (Green), Bearish (Red) or Neutral (Grey) based on the selected timeframes, which you can select on the dropdown selection.

The screenshot shows the 'Extreme Energy Indicator Timeframes' interface. It consists of two rows of four boxes each. Each box contains a dropdown menu at the top and a colored box below it. The first row has dropdowns for 30S, 1M, 3M, and 5M. The 30S and 1M boxes are green, 3M is grey, and 5M is grey. The second row has dropdowns for 30S, 1M, 3M, and 10M. The 30S box is red, 1M is grey, 3M is grey, and 10M is grey.

S = seconds, M = Minutes, H = Hour, D = Day & T = TICK (No. of ticks per candle/ bar)

It will only work when a Symbol is selected.

Main Strategy Selection Timeframe & Direction

You can activate the strategy up 4 timeframes. You can also activate both Buy & Sell simultaneously. When activated, it will be 1 of the following 3 colors:

Green = Activated for Buy

Red = Activated for Sell

Orange = Flat & ready to take the next signal

Account PnL

The Unrealized & Total PnL will reflect the current PnL for the selected Account only. Position is also the selected account & instrument traded only.

Unrealized: \$0.00
Total: \$0.00
Position: FLAT

Target & Limit

Target = To be used when you want to set a target profit in dollar (\$) amount.

Limit = To be used when you want to set a stop loss in dollar (\$) amount.

Target (\$)	Limit (\$)
0	-0
SET TARGET	SET LIMIT

To set them, click on the grey boxes & key in the amount, and then click the SET TARGET / SET LIMIT button. The color of the box will change accordingly to indicate as being active.

Target (\$)	Limit (\$)
100	-100
SET TARGET	SET LIMIT

When the Target or Limit is hit, there will be a note below the MATCH ACCOUNT button to indicate so.

MATCH ACCOUNT	MATCH ACCOUNT
🎯 TARGET HIT!	🛑 LIMIT HIT!

Flatten All & Match Account

Flatten All is used when you want to flatten all positions. The strategies will also be turned off when clicked.

Match Account is used if, for some reason, the actual account positions is dissimilar to the strategy positions. Clicking will cause the actual account positions to match with the strategy positions.

FLATTEN ALL
MATCH ACCOUNT

Sync

This is just to show if the strategies are in sync with the account in terms of the positions. It will correct itself if it is not.

A black rectangular box containing the text "Sync: ✓" in a green, monospace-style font.

Thank you!
