TOP EZ Dashboard_ME & TOP EZ Dashboard_HFT

The EZ Dashboard is a dashboard that combines the Market Energy strategy (for EZ Dashboard_ME) to trade and the Extreme Energy indicator to determine the chosen specific timeframe bullish, bearish or neutral direction. Similarly for the EZ Dashboard_HFT except it utilizes the Hedge Fund Trender strategy instead.

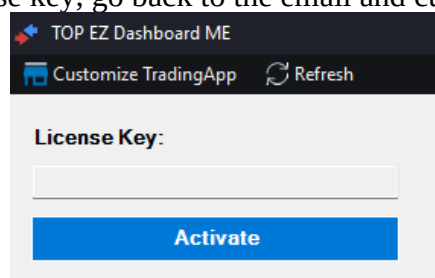

Both EZ Dashboards can be used independently.

Download and install the TOP EZ Dashboards

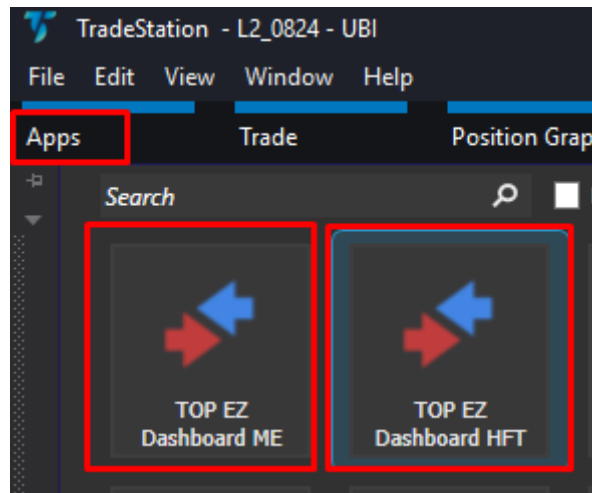

1. Locate the ELD file at where you downloaded it, then double click on it.
 - a. At the Import Wizard pop up window, click Next & Finish.

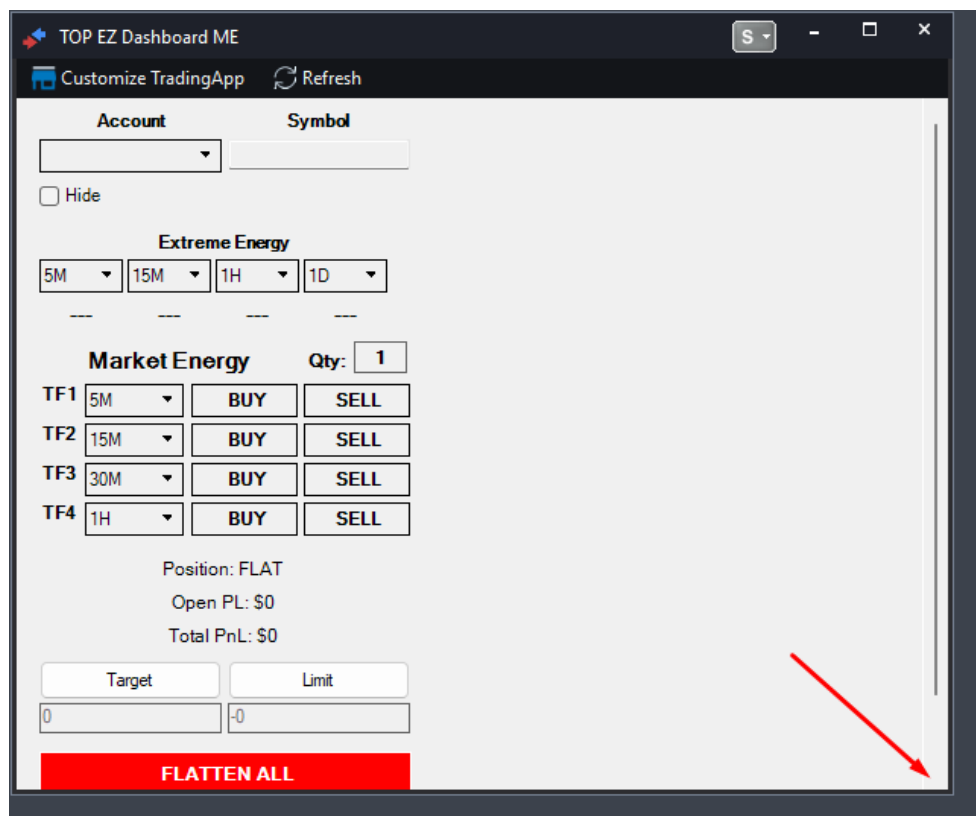

2. When asked for the license key, go back to the email and cut & paste it at the field.

Launching the TOP EZ Dashboard_ME & TOP EZ Dashboard_HFT

At the desktop, hover your mouse arrow over Apps. Click the Dashboard you want to use at the dropdown selection. It will pop up as a separate window.

If the size is off, you can resize it by clicking & dragging the corner of the window (or any part of the border).

Understanding & Using the EZ Dashboard

The screenshot shows the TOP EZ Dashboard ME interface. At the top, there's a title bar with 'TOP EZ Dashboard ME', a dropdown menu with 'S', and window control buttons. Below the title bar, there's a 'Customize TradingApp' button and a 'Refresh' button. The main interface is divided into sections: 'Account' and 'Symbol' at the top, followed by a 'Hide' checkbox. Below that is the 'Extreme Energy' section with four timeframes: '5M', '15M', '1H', and '1D'. The 'Market Energy' section features a 'Qty' dropdown set to '1' and four rows of timeframes (TF1, TF2, TF3, TF4) with 'BUY' and 'SELL' buttons. Below this, the 'Position' is set to 'FLAT', 'Open PL' is '\$0', and 'Total PnL' is '\$0'. At the bottom, there are 'Target' and 'Limit' input fields, both showing '0'. Two large buttons are at the very bottom: 'FLATTEN ALL' (red) and 'MATCH ACCOUNT' (orange).

Account

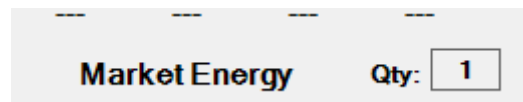

Select the account you want to use by clicking on the dropdown selection.

Instrument

You will have to key in the symbol you want to trade at the Symbol field.

Qty

Key in the number of contracts you want to buy or sell for per strategy.

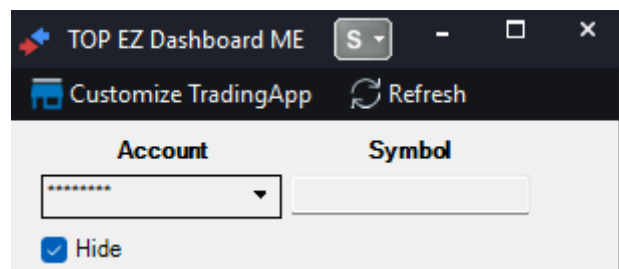

Market Energy Qty:

E.g. If all 4 strategies are turned on, then the total maximum position for this particular instrument will be $1 \times 4 = 4$.

Hide

Check this box if you want to hide your account number. It will also not appear at the tab of the Dashboard at the bottom.

Extreme Energy Indicator Timeframes

These 4 boxes will show the direction of either Bullish (Green), Bearish (Red) or Neutral (---) based on the selected timeframes, which you can select on the dropdown selection.

Extreme Energy

15S	30S	500T	15S
BULL	---	BULL	BULL

Extreme Energy

15S	30S	1M	3M
---	---	BEAR	BEAR

S = seconds, M = Minutes, H = Hour, D = Day & T = TICK (No. of ticks per candle/ bar)

It will only work when a Symbol is keyed in..

Main Strategy Selection Timeframe & Direction

You can activate the strategy up 4 timeframes. You can also activate both Buy & Sell simultaneously. When activated, it will be 1 of the following 3 colors:

Green = Activated for Buy

Red = Activated for Sell

Orange = Flat & ready to take the next signal

TF3	500T ▼	BUY	SELL
TF4	15S ▼	BUY	SELL

Account PnL

The Unrealized & Total PnL will reflect the current PnL for the selected Account only. Position is also the selected account & instrument traded only.

Position: FLAT
Open PL: \$0
Total PnL: \$0

Target & Limit

Target = To be used when you want to set a target profit in dollar (\$) amount.

Limit = To be used when you want to set a stop loss in dollar (\$) amount.

Target	Limit
0	-0

To set them, click on the Target or Limit boxes & key in the amount at the field below them. Then click the Target or Limit boxes again to confirm & activate. The color of the boxes will change accordingly to indicate as being active.

Note: Changing the amount directly at the amount field without clicking first the Target or Limit box will NOT affect the change.

Save	Save
0	-0

Target	Limit
100	-100

When the Target or Limit is hit, there will be a note below the MATCH ACCOUNT button to indicate so.

MATCH ACCOUNT	MATCH ACCOUNT
TARGET HIT	LIMIT HIT

Flatten All & Match Account

Flatten All is used when you want to flatten all positions. The strategies will also be turned off when clicked.

Match Account is used if, for some reason, the actual account positions is dissimilar to the strategy positions. Clicking will cause the actual account positions to match with the strategy positions.

Thank you!
